

Training Facility Newsletter

Enviro-Care Training Facility Phase II

In the February 2019 EC Newsletter, you saw the outside of the two buildings that Enviro-Care now occupies. At that time, both buildings were buried in snow. Quite a bit has changed since the snow.

The original EC building at 1570 St. Paul Avenue has undergone a make-over with new carpeting and paint plus more work stations and a small conference room. This building is still the main offices of Enviro-Care. The attached warehouse portion is completely devoted to a working shop and our growing inventory of spare parts.

The new building at 1556 St. Paul Avenue houses the learning center and equipment showroom. A portion of that warehouse will also be used to store large, slow moving inventory. But what the new building really provides is a welcoming space for our reps and customers.

1556 St. Paul Building

1570 St. Paul Building

The new learning center is housed in a larger, more comfortable space with floor-to-ceiling windows. Nothing like a little natural light to keep everyone alert. The equipment display area will utilize about 85% of the warehouse space with plenty of room to walk around the equipment and kick the tires. At the moment, the showroom is still a work-in-progress while we prepare equipment for WEFTEC. However, after WEFTEC, the plan is to display the equipment in a setting that resembles a trade show booth with banners and other signage.

We expect you to make very good use of this new resource. It was designed with you in mind. This is where you will bring your customers to discuss their requirements and options, give them the opportunity to view actual production equipment, and learn more

Two docks and a lot more off-road parking.

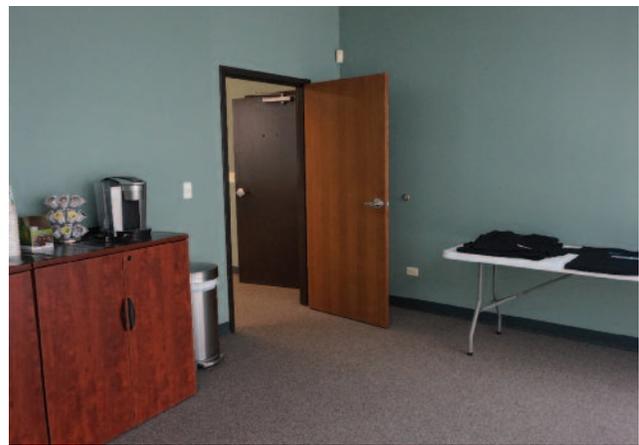

Training Facility Phase II

about the details of that equipment. And finally on day 2, our growing list of local installations provides a wide range of plants to visit and operators to talk to.

While the learning center will also be used for rep training seminars, it was primarily created for you and your customers. Contact your Regional Manager or Charlene Low, Marketing Manager, (clow@enviro-care.com) today to reserve the training center for a customer visit.

A brighter, roomier classroom with a place to display samples, a coffee bar and room for a nice breakfast or lunch buffet.

Plenty of room to view the equipment.
